Gravic's Shadowbase Products Group Announces Customer Certifications for HP Integrity NonStop Servers

Malvern, PA, January 29, 2007, Shadowbase creator Gravic, Inc., is pleased to announce that several customers have successfully completed their application upgrades to HP Integrity NonStop servers. These customers represent a cross-section of the financial services, telco, insurance, and travel industries. An example is Trisept Technology located in Milwaukee, WI. Trisept has ported their travel application from the S Series to Integrity NonStop servers and are very pleased with their performance.

"We initially released Shadowbase for the HP Integrity NonStop platform in February, 2006, affording Shadowbase's customers plenty of porting lead time to fully test their conversion efforts," according to Mr. Paul J. Holenstein, Executive Vice President at Gravic, Inc., "Gravic strives to stay ahead of the technology curve for our customers, performing our porting certifications on new platforms before our customers need them."

"Preservation of data integrity is a crucial need for customers in the financial services, telco, insurance and travel industries," said Michelle Weiss, vice president of marketing, Business Critical Systems, HP. "The successful completion of Gravic Inc. customer application upgrades to HP Integrity NonStop servers is a testament to the platform's ability to provide the highest levels of service for customer and 24x7 computing with fail-safe data integrity."

The Shadowbase Products Group provides solutions for data replication, data synchronization, and data validation for enterprise class customers in a variety of industries. These solutions span business continuity and disaster recovery, business intelligence, data warehousing, and zero downtime migration/upgrade functions.

Gravic, Inc. is a privately-held corporation located in Malvern, PA, about twenty miles west of Philadelphia, PA USA. Gravic makes a number of computer software products for data collection, transformation, and distribution uses. Customers for their Shadowbase products include the data centers of brokerages, travel agencies,

stock exchanges, electric utilities and telecommunications companies. For more information on Gravic, Inc. and Shadowbase visit <http://www.gravic.com/shadowbase> or email Shadowbase@gravic.com.
